

Renee Tice  
Innovation Manager—Nike, Inc.  
Bentley '01, MBA

## How Bentley turned Renee's passion for innovation into the business of life.

Renee Tice thrives on new ideas. In fact, a passion for innovation led Renee to choose the MBA program at the McCallum Graduate School of Business at Bentley—a program that offers advanced business leadership studies with a strong information technology focus. The technology resources at Bentley, such as the Center for Marketing Technology, gave Renee the hands-on experience she needed to hit the ground running when she graduated and landed a job with a global leader in athletic footwear and apparel. Today as an Innovation Manager with her company's Advanced Innovation Team, Renee is using both her MBA and her imagination to pursue her passion in the world of business... and succeed in the business of life.
