

Stephen Porter, MD, MPH, Children's Hospital Boston • Bentley '04, MSHFID

Pediatric specialist. Clinical informatician. Bentley business graduate.

When Stephen Porter entered medical school, the field of medical informatics hadn't been invented yet. Today, as a pediatric emergency medicine specialist at Children's Hospital in Boston, Dr. Porter knows all too well how information management can impact patient care. That's why he earned his graduate degree in business at Bentley, where he explored new methods for bridging gaps in safety and quality in the delivery of health services.

Business in a Whole New Light

Thanks to cutting-edge technology, innovative programs and a renowned faculty, Bentley is helping graduates like Dr. Stephen Porter break new ground in many fields of business. To learn more about our undergraduate and graduate business education programs, we invite you to contact Bentley today.
